

GAGGIA LA BRILLANTE

Bean-to-Cup Coffee Machine

In La Brillante, we have created a 'statement' machine, with minimalist styling that makes Gaggia Milano stand out from the crowd. For instance, the 7-inch touchscreen, the customisable LED frames and the overall use of premium materials give this fully-automatic machine a strongly contemporary look and feel.

Alongside all the latest technological solutions, the design of La Brillante primarily puts the spotlight on in-cup quality. Thanks to its transparent hoppers, customers can easily appreciate the quality and freshness of the ingredients, which adds a certain professional finesse to the service.
